

Question Bank

1. Explain Characteristics of Software Engineering.
2. Explain Software Cost.
3. Explain Software Myth.
4. Explain Software Quality Factors/Attributes.
5. Explain Software Process Models. (Waterfall,Spiral,Increment,Prototype)
6. What are Ethical responsibilities of Software Engineer?
7. Define: Software, System, System software, Application Software, Software Engineering, Computer Science.
8. Explain Types Of Requirements in SRS. (Types of Software Requirements)
9. Explain Software Metrics and Measurements.
10. Explain Design Strategies.
11. Explain Problem Partitioning.
12. Explain Abstraction.
13. Define: Requirements, SRS, Structured Oriented Design.
14. Explain Programming Practices.
15. Explain Programming Style.
16. Explain Top-Down and Bottom Up testing approaches.
17. Explain Test cases.
18. Explain Equivalence class partitioning.
19. Explain BVA.
20. Explain Cause Effect Graphing.
21. Define: Coding, Information hiding, Structured Programming, Functional Testing, Regression Testing.
22. Explain COCOMO Model.
23. Explain Verification and Validation.
24. Explain Software Project Management.
25. Explain Risk Management.
26. Explain software Reliability metrics.
27. Explain ISO-9000 Certification for software industry.
28. Explain SEI Capability Maturity Model.
29. Explain CASE.
30. Define: Risk, Software Maintenance, Software Reverse Engineering.
